

eMB Abstract, Bitumen CRC Fraud ■■ Missing QC Records ■■ ■■■■■■■■■■ ■■■■ ■■■■■■

AT A GLANCE — ■■■■ ■■■■

Ch.1 | eMB

Electronic Measurement Book ,
 sanitised abstract over-measurement, quality shortfalls
 Bitumen

The Electronic Measurement Book was designed to bring transparency, accuracy and accountability to civil works billing. Instead it produces a sanitised abstract that conceals the very details needed to detect over-measurement, quality shortfalls and bitumen record manipulation.

Abstract-Only Billing — Digital Building Without Foundation

eMB ☐ missing: Chainage-wise quantities, Layer-wise thickness, Cross-sections, Progressive totals ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ actions: (1) Contractor ☐ original bill full upload ☐ (2) Physical MB ☐ complete PDF ☐

Missing from e-MB: chainage-wise quantities, layer-wise thicknesses, cross-sectional measurements, progressive totals. Two non-negotiable mandatory actions when full digital entry is impractical: (1) Upload contractor's original bill in full. (2) Upload clear PDF of physical MB with complete line-by-line measurements.

Missing QC Test Records — Quality Only on Paper

Grade, density, Marshall stability, binder content — laboratory test results eMB billing trail ■■■■
 routinely absent ■ Materials ■■ specified standards ■■■■ ■■■ ■■ ■■■■ — ■■■ accessible
 record ■■■■■■

Laboratory test results for bitumen grade, density, Marshall stability and binder content are routinely absent from e-MB billing trails. No accessible record exists of whether materials met specified standards. Quality Control exists only on paper.

Ch.4 | Bitumen CRC — ■■■■■■■■■■ ■■ ■■■■

Bitumen CRC — The Single Mother of Corruption

Bitumen CRC ■■ Consumption Statement ■■ documentary chain ■■ ■■ prove ■■■■ ■■ ■■ bitumen genuinely ■■■■■■, deliver ■■ use ■■■■ ■■■■ absent ■■■■ ■■ auditor ■■ ■■■■ ■■■■ abstract figure ■■ — 'X MT bitumen used' — ■■■■ ■■ prove ■■■■ ■■ ■■■■, ■■ disprove■

Bitumen CRC (Consignment Receipt Certificate) and Consumption Statement are the documentary chain that proves bitumen was genuinely purchased, delivered and used. When missing, an auditor has only an abstract figure 'X MT bitumen used' with no way to prove or disprove it. CRC verification is universally identified as the single largest corruption vector in PWD road works.

Ch.5 | Fraud ■■ ■■■■ ■■■■■■ — Bitumen ■■■■ ■■■■■■■■

Four Fraud Pathways — How Bitumen Manipulation Happens

Pathway 1: Genuine CRC ■■■■ quantity alter■ Pathway 2: Fake/recycled CRC — same certificate multiple bills ■■■■ Pathway 3: Verification officer compromised■ Pathway 4: Consumption statement inflate — 80 MT use, 120 MT claim■

Pathway 1: Genuine CRC manipulation (quantity altered). Pathway 2: Fake or recycled CRC (same certificate in multiple bills). Pathway 3: Compromised verification (verifying officer is in collusion). Pathway 4: Inflated consumption statement (80 MT used, 120 MT claimed).

Ch.6 | ■■■■■■ ■■■■■■ ■■■■■■ ■■■■ — ■■■■ ■■ ■■■■■■

Why Roads Fail — The Real Public Cost

Sub-standard bitumen ■■ ■■■■■■ design life ■■ ■■■■ ■■■■■■ ■■■■ 10 ■■■■ ■■ ■■■■ 2-3 ■■■■ ■■ ■■■■■■ ■■■■ State ■■ additional maintenance ■■■■■■ Public safety ■■■■ ■■■■ Taxpayer ■■ ■■■■ ■■ ■■■■ ■■ ■■■■ tax ■■■■ ■■■■

Sub-standard bitumen produces roads that fail years before their design life. A road designed for 10 years fails in 2-3. This imposes higher maintenance costs on the state, endangers public safety through potholes and accidents, and forces taxpayers to fund the same road twice. When the digital system designed to prevent this becomes a vehicle for concealment, the reform loses credibility.

Ch.6B | 15 ■■■■, ■■■■ Ledger ■■■■ — EMD, SD, Dep-V ■■■■ ■■■■

15 Years Online Payments — Zero Contractor Ledger, Dormant EMD/SD/Dep-V

15 ■■■■ online payment — Contractor Ledger ■■■■■■ EMD+SD+Dep-V ■■■■■■ ■■ dormant■ e-Procurement EMD online collect — refund manual■ ■■■■■■: Digital Ledger, 31 March auto-email, e-EMD Refund, DLP alerts■

For 15 years online contractor payment has run. Yet no Contractor Ledger exists. EMD, SD, Dep-V lie dormant when contractor dies, records are lost, or track breaks. e-Procurement collects EMD online but has no e-EMD Refund system. Fix: Digital Contractor Ledger, automatic 31-March annual balance email, e-EMD Refund integrated in e-Procurement, DLP auto-alerts.

Ch.6C | ■■■■ ■■■■■■ — Gannon Dunkerlay, Bhairavji, Kotada

Rescinded Contracts — Zero Recovery (Bhairavji, Kotada, Gannon Dunkerlay)

■■■■■■ Bridge, Kotada Road, Gannon Dunkerlay — ■■■■■■ ■■■■ ■■■■■■ ■■■■■■ ~200 rescissions — ■■■■ systematic monitoring ■■■■■■

Bhairavji Bridge Banswara, Kotada Road Udaipur, Gannon Dunkerlay — three named cases, nil recovery. ~200 rescissions statewide, zero monitoring. Paper threat, no financial consequence.

Ch.6D | Recovery Portal ■■■■, Legal Pursuit ■■■■ — Impunity ■■ Architecture

Why No Recovery Portal? Why No Legal Pursuit? — Architecture of Impunity

Recovery Portal 15 ■■■■■■ ■■■ ■■■■ ■■■ — accountability ■■ ■■■■ ■■ ■■■■ Legal pursuit ■■■■ — Negligence ■■ Complicity■ Limitation periods expire ■■ ■■■ ■■■■ 5-point framework: Portal 90 days, Legal notice 30 days, Litigation register, Limitation alerts, ACB referral■

Q1: Why no Digitised Recovery Portal in 15 years despite full technical capacity? Because visibility means accountability — which the system avoids. Q2: Why no legal pursuit? Either Gross Negligence or Complicity — same officer who paid refuses to collect. Limitation periods expiring unnoticed. Five-point framework required.

Ch.7 | ■■ Minimum Corrective Actions — ■■■■■■

Six Minimum Corrective Actions — Immediate

1. Contractor ■■ original bill upload ■■■■■■■■■■ 2. Physical MB ■■ complete PDF■ 3. QC test abstract upload■ 4. Bitumen CRC copies upload■ 5. Consumption Statement ■■ CRC cross-link■ 6. Documents absent = payment withheld■

1. Mandate upload of contractor's original bill. 2. Upload complete physical MB PDF. 3. Upload QC test abstract. 4. Upload Bitumen CRC copies. 5. Cross-link Consumption Statement with CRC (mismatch = auto-flag). 6. Treat missing documents as ground for withholding payment.

Ch.8 | ■■■■■■ ■■ ■■■■ ■■ ■■■■■■ — ■■ ■■■■■■

Call to Media & Public — Eight Demands

1.RTI — CRC upload status■ 2.CAG audit: bitumen claimed vs received■ 3.CRC verification sting■ 4.Recent roads ■■ core cutting test■ 5.Department circular — uploads mandatory■ 6.Bitumen supplier public list■ 7.Public portal — bill tracking■ 8.ACB investigation — duplicate CRC■

1.RTI on CRC upload status. 2.CAG audit of bitumen claimed vs received. 3.Sting on CRC verification. 4.Core cutting test on recent roads. 5.Department circular mandating uploads. 6.Public bitumen supplier list. 7.Public portal for bill tracking. 8.ACB investigation where CRC is reused.
