

Electronic Measurement Books: The Digital Veil Over Road Corruption

EMD/SD/Dep-V · Rescinded Contracts · Recovery Portal ■■■■

A complete investigative expose of PWD road works corruption enabled by absent digital accountability

Abstract	5	0	CRC
e-MB has no line-by-line data — summary only	CRC Fraud pathways — incl. multi-project reuse	QC Test Abstracts routinely uploaded	Bitumen CRC — Single Mother of Corruption
15 Yrs	EMD+SD	~200	90 Days
Online payments — ZERO Contractor Ledger built	Dormant deposits — no ledger, no statement, no refund	Contracts rescinded — ZERO recovery monitoring	Time to build Recovery Portal — never done

e-MB Promise vs Ground Reality

The Electronic Measurement Book was designed to bring transparency, accuracy and accountability. Instead it produces a sanitised abstract that conceals exactly what is needed to detect over-measurement, quality shortfalls, and bitumen manipulation.

Abstract-Only Billing — Digital Building Without Foundation

Missing from e-MB: chainage-wise quantities, layer-wise thicknesses, cross-sectional measurements, progressive totals. Two non-negotiable actions when full digital entry is impractical: (1) Upload contractor's original bill in full. (2) Upload complete physical MB as PDF.

Missing QC Test Records — Quality Only on Paper

Laboratory test results for bitumen grade, density, Marshall stability, and binder content are routinely absent. No accessible record of whether materials met specified standards. QC exists only on paper.

Bitumen CRC — The Single Mother of Corruption

Bitumen CRC (Consignment Receipt Certificate) and Consumption Statement form the documentary chain proving genuine purchase, delivery, and use. When absent, auditor has only an abstract figure — 'X MT bitumen used' — with no way to prove or disprove it.

Ch.5 | Fraud ■■■ ■■■■■ ■■■■■■■ — Pathway 5: ■■ CRC, ■■ Projects

Five Fraud Pathways — incl. Multi-Project CRC Reuse

P1: CRC alter■ P2: Fake CRC■ P3: Verification compromised■ P4: 80 MT use, 120 MT claim■
P5 (■■ — ■■■■ ■■■■■■■): ■■ CRC ■■■ projects ■■■ — 100 MT delivery, 300 MT payment■ Centralised CRC Registry ■■ ■■■■ invisible■

P1: CRC quantity altered. P2: Fake/recycled CRC. P3: Verification officer compromised. P4: Inflated consumption (80 MT used, 120 MT claimed). P5 NEW (most dangerous): Same contractor submits same CRC across multiple projects simultaneously — one 100 MT delivery claimed at 3 projects = 300 MT payment. Invisible without a centralised statewide CRC registry.

Ch.6 | ■■■■■ ■■■■■ ■■■■■ ■■■ — ■■■■ ■■ ■■■■ ■■■■■■■

Why Roads Fail — The Real Public Cost

Sub-standard bitumen: 10 ■■■ ■■ ■■■■ 2-3 ■■■ ■■■ ■■■■■ ■■■ Double maintenance cost■ Public safety risk■ Taxpayer ■■ ■■■ tax ■■■■ ■■■■

Sub-standard bitumen: roads fail years before design life. A 10-year road lasts 2-3 years. Higher maintenance costs on state. Public safety endangered. Taxpayer funds the same road twice. When digital system designed to prevent this becomes a vehicle for concealment, the reform loses all credibility.

Ch.6B | 15 ■■■, ■■■ Ledger ■■■■ — EMD, SD, Dep-V ■■■ ■■■■

15 Years — Zero Contractor Ledger, Dormant EMD/SD/Dep-V

15 ■■■■ online payment — Contractor Ledger ■■■■ EMD+SD+Dep-V ■■■■■ ■■ dormant■ e-Procurement EMD online collect — refund manual■ ■■■■■■: Digital Ledger, 31 March auto-email, e-EMD Refund integration, DLP auto-alerts■

15 years of online payments — no Contractor Ledger ever built. EMD, Security Deposit, Dep-V lie dormant when contractor dies, records lost, or track breaks. Department never volunteers to return them. e-Procurement collects EMD online but has no e-EMD Refund system. Fix: Digital Ledger per contractor; mandatory 31-March annual balance email; e-EMD Refund integrated in e-Procurement; DLP auto-alerts.

Ch.6C | ■■■■ ■■■■■■ — ■■■■■■ Bridge, Kotada Road, Gannon Dunkerlay

Rescinded Contracts — Bhairavji Bridge, Kotada Road, Gannon Dunkerlay

■■■■■■ Bridge, Kotada Road, Gannon Dunkerlay — ■■■■■ ■■■ ■■■■■ ■■■■■■ ~200 rescissions — ■■■■ systematic monitoring ■■■■■■ Blacklist enforce ■■■■■■

Three named cases: Bhairavji Bridge Banswara (rescinded, nil recovery), Kotada Road Udaipur (rescinded, nil recovery), Gannon Dunkerlay & Co — established firm, contract rescinded, substantial dues unexercised, company walked free. ~200 rescissions statewide, zero monitoring. Rescission is a paper threat, not a financial liability.

Ch.6D | Recovery Portal ■■■■, Legal Pursuit ■■■■ — Impunity ■■ Architecture

Why No Recovery Portal? Why No Legal Pursuit? — Architecture of Impunity

Recovery Portal 15 ■■■■■■ ■■■ ■■■■ — visibility = accountability ■■ ■■■■■■ Legal pursuit ■■■■ — Negligence ■■ Complicity■ Limitation expire ■■ ■■■ ■■■■ Framework: Portal 90 days, Notice 30 days, Register, Alerts, ACB referral■

Q1: Recovery Portal not built in 15 years — because it would make every non-recovery visible and attributable to a named officer. Q2: No legal pursuit because of either Gross Negligence or Complicity — the same officer who processed payments is the officer who refuses to collect. Limitation periods expiring unnoticed. Five-point framework: Portal in 90 days; legal notice in 30 days; litigation register; limitation alerts; same-officer overlap = ACB referral.

Ch.7 | ■■■ Minimum Corrective Actions — ■■■■■■

Seven Minimum Corrective Actions — Immediate

1.Original bill upload■ 2.Physical MB PDF■ 3.QC abstract■ 4.Bitumen CRC copies■
5.Consumption Statement cross-link■ 6.Centralised CRC Registry■ 7.Documents absent = payment withheld■

1.Mandate upload of contractor's original bill. 2.Upload complete physical MB PDF. 3.Upload QC test abstract. 4.Upload Bitumen CRC copies. 5.Cross-link Consumption Statement with CRC — mismatch auto-flags. 6.Centralised CRC Registry — one CRC, one bill only. 7.Missing documents = payment withheld + scrutiny initiated.

Ch.8 | ■■■■ ■■■■■■ ■■ ■■ ■■■■■■

Thirteen Media & Public Demands

1.RTI CRC upload■ 2.CAG bitumen audit■ 3.CRC sting■ 4.Core cutting test■ 5.Department circular■ 6.Supplier public list■ 7.Public portal■ 8.CRC duplication ACB■ 9.Dormant deposits RTI■ 10.e-EMD expose■ 11.Ledger sting■ 12.Recovery RTI■ 13.Blacklist register■

1.RTI on CRC upload status. 2.CAG audit bitumen claimed vs received. 3.CRC verification sting. 4.Core cutting test on recent roads. 5.Department circular mandating uploads. 6.Public bitumen supplier list. 7.Public bill tracking portal. 8.CRC duplication ACB audit. 9.RTI on dormant EMD/SD deposits. 10.e-EMD Refund expose. 11.Contractor Ledger sting. 12.Rescinded contracts recovery RTI. 13.Blacklisting register demand.
